

B[★]ingo

A classic game perfect
for classroom fun!

How to Play the Bingo Game

Bingo comes with different cards for each student. You can print this game on either a color or a black and white printer. You should either print your cards on cardstock, or glue them to construction paper and laminate them. Your students will love to play Bingo so much that you want these cards to be very sturdy.

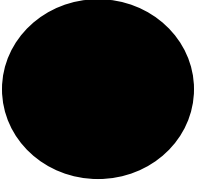

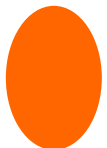

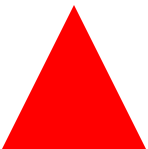

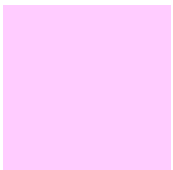

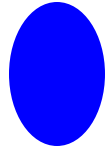

You will need to cut the master cards apart. These are the cards you will hold up and “call” the Bingo game from.

It is a good idea to give the winner of Bingo a small prize. Stickers and erasers work well, and they make it so the kids get really into the game hoping to win.
